

OPERATIONS MANAGEMENT SCHEME

Ready.
Set.
Grow!

Making sure our critical, customer-based services swim more smoothly than a well-oiled otter – while portraying who we are to the millions of people we connect

Spend time rotating across three essential areas of frontline business management: Customer Experience and Operations, Fraud and Revenue Assurance, and our Customer Contact Centre during the two-year Operations Management Scheme.

We'll provide a wide range of business areas covering TV, broadband, mobile and fixed voice communications. These include the country's fastest network speeds, and our very own TV channels! It's an energetically-paced digital marketplace where projects can change direction with the click of a mouse. You'll need to be able to move with the times and make quick-witted decisions, even if you don't have all the information at hand.

It's a diverse and challenging scheme for a resilient all-rounder with outstanding communication skills, commercial acumen and the confidence to challenge the status quo.

If you're interested in stepping up to the frontline and making your mark, please **APPLY NOW**
