# Job Details

**Title:**        **Software Developer**
**Team:**        **Agent Tools and AI Team, Consumer Solutions, Virgin Media/Liberty Global**
**Location:**    **Limerick**
**Type of Role:** **Permanent**

# About the Role:

- Key member of the Agent Tools and AI team within Virgin Media and Liberty Global, Technology and Innovation (T&I).

- The role will be focused on delivering innovative, customer focused solutions in the competitive and fast paced broadband and mobile services market.

- The roles will be responsible for both requirements analysis, technical design, implementation and support of multiple applications within Virgin Media Ireland and Liberty Global T&I.

- Proactive member or a self-organising, highly skilled, agile software development team based in Limerick, Ireland.

# Specific Tasks/ Duties:

- Translate broadband, mobile and CRM domain business requirements into clearly defined systems feature enhancements.

- Specify enterprise class designs that align to Virgin Media's IT delivery principles.

- Implement and test high quality object oriented centric systems.

- Provide proactive support for systems developed by the Virgin Media or Liberty Global IT solutions teams.

- Required to provide innovative ideas and solutions regarding systems design and technology enhancements within a collaborative and team focused ethos.

- Required to collaborate and contribute to a positive and innovative development team atmosphere by providing support and help when needed.

# Key Deliverables

- High quality software assets that deliver customer and businesses expectations with minimal issues or defects.

- Software assets that align to the Virgin Media and LGI architecture principals and roadmaps.

- Re-usable assets that deliver an excellent user experience.

- Secure systems that protect our end user's data privacy.

- Willingness to travel on occasions to various sites and locations across Liberty Globals sites in Europe.

## The Person Should Have:

- Over 4 years' hands on industry experience in software delivery roles specialising in .NET or object oriented development roles.
- Good knowledge of all aspects of the software development lifecycle.
- Continuous integration or DevOps experience using one or more of the following products (TFS, GIT, NuGet, Octopus and ProGet).
- Unit testing framework experience using products such as NUnit.
- Experience of .NET Frameworks 3.5, 4 or 4.5.
- Experience of ASP.NET, VB.NET, ASP.NET MVC and C# Development.
- REST and SOAP Web Service development using Microsoft WCF and Web API.
- Experience of development using UI and client-side scripting frameworks and CSS using JavaScript AJAX based frameworks such as AngularJS, Bootstrap or Backbone.
- Experience of Microsoft Visual Studio 2010, 2012 or 2013.
- Experience of T-SQL with Microsoft SQL Server 2008, 2012 or 2013.

It would be highly desirable if the employee had experience in the following skills also.

- Agent Desktop systems development including PEGA or RTI (Real Time Interactions)/EGLUE
- Agile SCRUM software methodology experience using products such as JIRA Agile.
- Experience using pattern based design and architecture in particular MVC and Enterprise pattern development.
- Distributed .NET and IIS experience specialising in performance and stability.
- Graphical UI design and development using CSS.
- Graphical design using tools such as Paint Shop Pro or GIMP.
- Ecommerce and sales solutions experience.
- Developing or integrating with CRM systems e.g. Amdocs
- Experience of data transfer and job management using tools such as SQL Server job manager and DTS.
